Instructions for connecting to the Oracle DB

Instructions related to the information systems at Paris-Sud can be found (in french) at:
https://www.dep-informatique.u-psud.fr/utilisation_infomatique
Specifically, for instructions about the databases:
https://www.dep-informatique.u-psud.fr/node/351

The document below illustrates the steps to connect to the database graphically.

1   Connecting to your account:

If you are on a computer from Paris Sud: just type your login/password. Otherwise, connect through ssh to
tp-ssh1.dep-informatique.u-psud.fr (if it is down, try tp-ssh2):

```
ssh john.doe@tp-ssh1.dep-informatique.u-psud.fr
```

2   Connecting to oracle:

If you forgot your short login

```
john.doe@a-140395 ~ $ pwd
/home/tp-home002/jdoe
```
↪ the shortlogin is jdoe

Connect to oracle using sqlplus

The login for sqlplus is "C##your_short_login" and password is "your_short_login"

```
john.doe@a-140395 ~ $ sqlplus C##jdoe_a/jdoe_a

...

SQL>
```

You should not need it but the database SID is dbinfo
